Accent Reduction

If you dream of speaking English with a clear, British accent - you can achieve your dream. Our proven accent reduction programme helps non-native speakers of English to accurately hear and reproduce a standard British accent (the accent called Received Pronunciation or RP). Don't let your accent hold you back - because you CAN change it.

Elocution Lessons

Many people want to soften an unloved regional accent. They want to gain some control over the impression they give or to be able to blend in at every level without being instantly labelled. Elocution training also helps you speak more clearly and expressively with greater range and interest in the voice.

There are 4 major areas of work

Movement - What the muscles do to shape the accent

How the Vowel and Consonant movements create the 'sound' and 'facial expression' of an accent. We start by giving you muscle training exercises to get your face and tongue moving in a new groove.

Rhythm and Tune

We study how stress (emphasis) is applied with loudness and tune to give different layers of meaning. Also how we link sounds together into fluid units.

The Sounds - Vowels and Consonants

We will look in more detail at the 20 (yes 20!) vowel sounds and how to make them clearly different. We'll focus on your problem sounds and on how the sounds relate to what is written. We will also look at the 24 consonant sounds in RP English and focus on those that are causing you problems.

Spelling Rules

Spelling is not at all obvious in English. We look at the rules of spelling you can trust and the lists of 'exceptions' you have to memorise. Our materials are based on lists of the most common 500, 1000 and 7000 words in English. We familiarise you with the most common vocabulary and also the most unusual spellings.
